	Spray Mount. Repositionable transparent adhesive. Suitable for mounting photographs, posters, prints. Its delayed drying effect allows you reposition pictures after having been applied to backboards. 400 ml spray can.	15,50	3	5%	12	10%	24	12%	661				
	Photo Mount. Permanent, transparent adhesive. Suitable for photos, posters, prints. The immediate drying effect does not allow repositioning. 400 ml spray can.	14,50	3	5%	12	10%	24	12%	662				
	Super Spray 77. Permanent transparent adhesive. Fast drying and highly adhesive. Suitable for light materials such as paper, cardboard, wood, glass, fabrics, plastics, etc. Spray it on both surfaces to glue at least 30" before mounting them. 500 ml spray can.	13,00	3	5%	12	10%	24	12%	663				
	Spray 75. Repositionable. 500 ml spray can.	13,00	3	5%	12	10%	24	12%	660				
	Transparent Vinavil NPC glue. Suitable for mounting wood, paper, cardboard, chipboard, fabrics, etc.a	1 kg container	5,20	3	5%	10	10%	20	14%	612			
		5 kg container	22,00	4	10%					612T			
	Vinilgubra Speed glue. Transparent highly concentrated glue. Thanks to its quick (only 10 minutes) and high adhesivity it is suitable for joining frames. 250 gram container.	4,90	6	10%	24	15%			618				
	Quick drying transparent glue. 200 ml bottles with nozzle for spreading.	3,60	6	10%	12	15%	24	20%	652				
	Ethil cyanoacrylate glue with immediate drying effect. Mounts almost any material. Takes approx. 20 seconds to dry. 10 gram bottle. Keep in a cold place (especially during Summer).	3,90	3	6%	6	10%			668D				
	Contact glue "Collaprene". Suitable for almost any material: wood, paper, metal, cardboard, plastic, fabrics, gum and so on. Apply a light coat on both parts and wait 10 minutes; then join and press strongly. Immediate drying effect. 75 ml tube.	1,80	6	10%	12	15%	24	20%	667				
	Silicone "Gubrasil". Transparent adhesive. Used for mounting anything on glass. 280 ml tube.	4,00	6	8%	12	10%			654				
	Gun for silicone. Used for pushing the silicone out of its tube.	2,50	3	8%					651P				
	Electric glue gun M220. Power: watt 220. Professional gun suitable for intensive use. It works with hot-melt glue sticks. As the gun warms up the glue stick melts and comes out in a semi-liquid state from the nozzle. With electronically adjusted temperature.	88,00	3	5%					M220				
	Transparent hot-melt glue sticks for gluing guns. Length 20 cm. Diameter 12 mm. Maximum exposing time (during which the glue remains liquid) 15 seconds.	5,60 per kg	5	10%	20	15%	50	18%	631K				
	Manual Rollataq Applicator. The glue, contained in the body tank, is spread on the surface by rolling the applicator. The dimpled roller allows for the glue to be applied in a thin even coating. Particularly suitable for sticking dust protection paper on the back of frames because the glue does not go over the edges of the frame. Roll length: 65 mm.	28,00	3	6%					RQ				
	Rollataq glue. Water-based liquid, non-curl and non-toxic adhesive. Suitable for mounting prints and photographs onto backing boards that remain repositionable for a few minutes. 473 ml bottle.	11,80	3	6%					RQ5				
	Transparent adhesive tape. For different uses.	Width	Length	0,80	6	35%	30	40%	120	45%	68115
