	Grey cardboard. Light and easy to cut. Excellent flatness. Uniform thickness. Perfectly trimmed edges. Whitstands all climatic conditions. Packing of grey cardboard is economic, made of plastic bands only, so as to maintain the price of the cardboard convenient for you. This in consideration it is a "poor" material, used hidden in the back of the frame. We advise then that the two sheets exposed then could arrive damaged or dirty. If you order at least 200 sheets, we use pallets to pack them and send them to you.	mm 2	80x120	20 sh.	1,50	20	20%	80	25%	250	30%	500	33%	4312G
