	Toyo oil glass cutter, manufactured in Japan. With tungstene wheel and metal handle. Cutting life: ca 14 km.	19,50			202		
	Toyo oil glass cutter, manufactured in Japan. With tungstene wheel and plastic handle, that allows to check the oil level. Cutting life: ca 14 km.	19,00	3 6 12	5% 10% 15%	203		
	Spare tungstene wheels for Toyo glass cutters, both for metal cutter (code 202), and the plastic transparent one (code 203).	16,80	per type		204		
	Lubricating oil for glass cutters. Available in 1 litre bottles or in 25 ml oilers.	1 litre bottle 25 ml oliator	3 6	5% 8%	207L		
	Fletcher Circle Mate glass cutter. Can cut circles of minimum 13 cm diameter. It can also cut glass longitudinally by using the included bar base instead of the vacuum cap base. Max diameter 70 cm. Max longitudinal cut 30 cm.	53,00	3	6%	212		
	Hexagonal cutting block with 6 spare wheels.	8,50	3	6%	2126		
	Fletcher Oval/Circle glass cutter. Can cut ovals up to 62x54 cm. The maximum difference between the long axis and the short one is 8 cm. The minimum size of ovals is 11 cm in the long axis. Can cut circles from 11 cm up to 53 cm in diameter.	84,00	3	6%	210		
	Tungstene spare wheels for Fletcher Oval/Circle glass cutter.	19,00	3	6%	2105		
	Squares for glass cutting.	Length of cut 70 cm	25,00	3 10 per type	10%	21370	
		Length of cut 87 cm	28,00		15%	21390	
		Length of cut 110 cm	34,00		15%	213110	
		Length of cut 123 cm	39,00		15%	213125	
	Squares for volume work. Also used for cutting glass longitudinally. Maximum cutting width 60 cm.	26,00	3	6%	214		
	Laminated straight-edge rule. Used as a guide for cutting large sheets of glass. 244 cm long. 75 mm wide. 10 mm thick.	26,00	3	8%	215		
	Carborundum file for glass hand-seaming. Wet the file before its use. Dimensions 2,5x5x20,4 cm.	14,50	3	6%	219		
	Glass seamer composed of a pair of cylindrical grinders of 12,8 cm length and a diameter of 1,8 cm. Used for polishing cut glass edges but not for a complete polish. It could therefore be used when making clip frames and in when one wants to eliminate the danger of cutting himself whilst handling the sheet.	22,50	3	6%	220		
	Spare cylindrical grinders (length 12,8 cm - diameter 1,8 cm). Price per single grinder, not pair.	9,20	3	6%	2205		
	Diamond pad Telum, produced in Switzerland by KGS. Made of a small plate covered with a special diamond sand fixed on a polystyrene pad which makes it easier to hold. Used for seaming glass cut edges and awkward ribs. Can be used also to sand and smooth rough wooden corners of frames. Wet the pad before using it. Dimensions 2,7x5,8x9,3 cm.	14,50	3 10 30	10% 15% 20%	221		
	Glass wiping paper in rolls. Each roll weights 4 kg and has a diameter of 27 cm. The paper is 27 cm wide and 300 mt long. Tears at every 38 cm.	11,50	2 6 12	5% 10% 13%	208		
	Dispenser for paper rolls (see above). Can be fixed to a wall or just placed on a work-bench.	22,50	3 6	6% 10%	209		
	"Marylla" detergent for cleaning glass. 750 ml bottle.	2,40	6 18	20% 30%	228		
	Antistatic styrene cleaning solution. 250 ml bottle.	6,90	3	6%	769		
	Anti-static cloth suitable for cleaning glass plates. Absorbs and removes dust particles. When it is dirty it should be discarded. It is not advisable to wash it.	cm 13x18	2,90	3	6%	6694	
		cm 25x45	6,80	3	6%	4700	
	Microfibre Cloth 40x40 cm for cleaning of the glass. Spray the glass with water and wipe the cloth. Periodically, the cloth should be washed with warm water. No bleach and no fabric softeners.	3,40	3	6%	4632		
	Acid paste to engrave the glass 30 ml	12,30			G5PM		
	Lightweight Fletcher pliers for glass cutting. Made of reinforced glass fibers. Helpful in reducing hand fatigue.	14,00	3 6	5% 8%	217		
	Scoring knife for plastic glass (polystyrene, crilex, etc).	0,90	3 6 12	20% 30% 40%	234		
	Gloves for safe managing of glass.	3,50 per pair	3 10	6% 10%	216		
	Nail remover for opening wooden containers of glass. 500 mm long.	8,80	3	6%	247		
	Extendable support for glass cleaning. It grips on most surfaces thanks to its non-skid feet. The rubber bumpsons hold glass stationary while cleaning or cutting and eliminate the hazard of manually holding on to the material. After use the device can be closed and placed apart.	max size of the glass
