<p>The open grain finish reveals the natural grain of the wood. The irregularities of the surface are perceived by touch. With the matt or glossy lacquering, on the other hand, the finish appears homogeneous and smooth. The open grain frame is cleaned with a soft cloth without scratching, using lukewarm water and neutral detergents.</p> <p>The price of 10 mm mouldings is much higher because the wood is ramin.</p>	Open grain finish	Open grain	Open grain	Open grain	Open grain	Open grain finish
